### The Canifugue Small set is a modern, reliable and efficient anti-runaway system for your runaway cat or small dog.

No longer worry about your runaway cat or small dog. Thanks to the NUM'AXES anti-escape fence, you can keep one or more animals, in complete freedom, within a perimeter that you define.

You delimit the free space of your cat or small dog by installing a wire, called an antenna wire, around the authorized perimeter. This wire is traversed by a radio signal coming from a transmitter box.

When your animal, equipped with a receiver collar, approaches the antenna wire, it is warned by audible warnings that it is too close to an area which is prohibited for it.

If it continues to approach the wire, the collar emits electrostatic stimulation in addition to the audible warnings.

Your pet must move away from the wire and return to the authorized area to stop the audible warnings and electrostatic stimulation.

- Unlimited number of collars for the same transmitter box
- Integrated security systems
- Adjustable stimulation intensity on each collar (8 levels)
- Rechargeable collar
- The wire is laid on the ground, buried or overhead on an existing fence.
- For the system to work, the wire must form an unbroken loop that runs from and back to the transmitter box.
- Adjustable zone width (sound warnings / electrostatic stimulation)
- System secured by 3 integrated safety devices:
  - wire break indicator
  - evacuation of the audible warning zone
  - evacuation of the stimulation zone

- There is no limit to the number of receiver collars for a single transmitter box: you can safely keep as many dogs as you want within the same perimeter.
  - For each collar, 8 levels of stimulation are available, allowing you to best adapt the intensity of the stimulation to your dog (size, sensitivity, character).
- 
- 2 years warranty
  - Immersion-tight collar
  - Collar autonomy: around 80 hours in normal operation

#### Transmitter box

- Dimensions: 117 x 110 x 28 mm
- Power supply: mains (220 V AC)

#### Anti-fugue collar

- Weight: 23g
- Dimensions: 44 x 28 x 25 mm
- Power supply: 3.7V Lithium-Polymer rechargeable battery
- Nylon strap **with anti-strangulation elastic** : adjustable at the neckline from approximately 17 to 55 cm
