ON3950	Mountmaster 3-9x50	Vente libre	12	21	1/4 MoA	60	60	Yes	129.00 € incl. tax

Easy-to-adjust rifle scope thanks to its ergonomic turrets.

Very wide field of vision goggle approximately 20% more than other 1" body goggles.

- Adjustment in 1/4 MOA clicks (7mm at 100m)
- AO (Adjustable Objective) model: adjustable focus from 10m to infinity.
- Ergonomic focus ring on the lens. Adjustable diopter eyepiece.
- Half Mil Dot type reticle
- Watertight body under nitrogen pressure.
- Supplied with clamps for 11mm rail.

The 3-9x50 is also at ease for long distance shooting and for hunting on the lookout or approaching big game (wild boar, stag, roe deer).

Its large lens offers a wider field of vision than glasses in the same category. It allows pleasant, crisp and bright sightings, even in low light in the forest.

Its low weight, which in no way detracts from reliability, provides a light rifle and scope set, ideal for long days of hunting.

Its Mildot reticle makes it possible to make ballistic corrections in windage and elevation, thanks to its graduations according to the firing distance and the climatic conditions, without it being necessary to modify the position of its turrets.
