### A compact telescopic sound suppressor dedicated to hunting on the move!

An ultra-compact sound reducer from the Stalon range intended for hunting.

- Excellent sound reduction of 30.5 dB (in .308w caliber)
- diameter of 49 mm, length of 237.5 mm and weight of 344 g.
- Length in front of the barrel 149 mm, the rear encompasses the barrel.

Cal. Max .223 = .22-250, .22 hornet, .222, .223

Cal. Max 6.5mm = 6mm, .243, 6.5CD, 6.5x55

Cal. Max 308 = 270 Win, 7x57, 7x64, 7mm RM, 7.62x51, 308 Win, 300 WM, 30-06 Spr

Cal. Max 375 = 7.92x57, 338 WM, 9.3x62, 375 H&H

An excellent sound reducer developed for hunting rifles.

- Machining in matte black anodized aeronautical aluminum alloy
- Stainless steel baffle and thread
- Barrel covering system with rear decompression chamber
- Recoil reduction
- Significant durability
- Front part of the silencer interchangeable to adapt to several calibers
- Low protrusion of the sound reducer at the front of the barrel (149mm), despite a length of 23.7 cm!
- Maximum barrel diameter: 22.5 mm

A silencer with impeccable finishes with its touch of elegance.

Its telescopic system with barrel covering allows mass distribution providing rigidity and prevents any deformation of the folding barrel under the weight of the silencer.

This allows you to maintain incredible precision, while shooting discreetly.

The strong point of STALON silencers is the right balance between acoustic performance, weight, ease of assembly and size.

Equip yourself with the best silencer for hunting, especially for hunters approaching or lying in wait.

The strength of the STALON X108 is its interchangeable front part. If you have several hunting rifles of different calibers but with the same thread, it is only possible to swap the front part of the silencer, without having to purchase a sound moderator per rifle.

In order to measure the sound attenuation power of their silencer, STALON relied on a strict military protocol, MIL-STD-1474D. This protocol is used in military equipment and allows the capacity of a sound moderator for assault rifles and war weapons to be measured precisely and not erroneously.

Find the protocol in detail by [clicking here](#).
